Dubai Islamic Bank Pakistan Limited
Capital Adequacy, Leverage Ratio & Liquidity Requirements Disclosures
As at December 31, 2023

1 Capital Adequacy

1.1 Capital Management

Capital Management aims to safeguard the Bank's ability to continue as a going concern so that it could continue to provide adequate returns to shareholders by pricing products and services commensurately with the level of risk. For this the Bank ensures strong capital position and efficient use of capital as determined by the underlying business strategy i.e. maximizing growth on continuing basis. The Bank maintains a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The impact of the level of capital on shareholders' return is also recognised and the Bank recognises the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position.

The State Bank of Pakistan (SBP) has prescribed guidelines with respect to disclosure of capital adequacy related information in the financial statements of banks. These guidelines are based on the requirements of Basel III which were introduced earlier by the SBP in August 2013 for implementation by banks in Pakistan. The SBP has specified a transitional period till 2018 for implementation of Basel III. The disclosures below have been prepared on the basis of the SBP's guidelines.

1.2 Goals of Managing Capital

The goals of managing capital of the Bank are as follows:

- To be an appropriately capitalised institution, considering the requirements set by the regulators of the banking markets where the Bank operates;

- Maintain strong ratings and to protect the Bank against unexpected events; and

- Ensure availability of adequate capital at a reasonable cost so as to enable the Bank to operate adequately and provide reasonable value addition for the shareholders and other stakeholders.

1.3 Statutory Minimum Capital requirement and Management of Capital

The State Bank of Pakistan (SBP) vide circular no.7 dated April 15, 2009 had set the Minimum Capital Requirement (MCR) for banks of Rs 10 billion to be achieved in a phased manner by December 31, 2013. The paid up capital of the Bank for the year ended December 31, 2023 stands at Rs. 11.65 billion (2022: Rs. 11.65 billion) and is in compliance with the SBP requirement for the said year. The Bank has met its minimum caital requirement by conversion of FCY sub-ordinated debt from the sponsors placed in non-remunerative deposit account with SBP to paid up capital.The capital adequacy ratio (CAR) of the Bank is subject to the Basel III capital adequacy guidelines stipulated by the State Bank of Pakistan through its BPRD Circular No. 06 of 2013 dated August 15, 2013.The Capital Adequacy Ratio (CAR) requirement as of December 31, 2023 is 11.50% whereas DIBPL's CAR stood at 17.99%

1.4 Capital Structure

Under Basel III framework, the Bank's regulatory capital has been analysed into two tiers as follows:

- Tier 1 capital (going concern capital) which is sub divided into:

a) Common Equity Tier 1 (CET1), which includes fully paid up capital, reserve for bonus issue, general reserves and un-appropriated profits (net of losses), etc after deductions for investments in the equity of subsidiary companies engaged in banking and financial activities (to the extent of 50%), reciprocal crossholdings and deficit on revaluation of available for sale investments and deduction for book value of intangibles.

b) Additional Tier 1 capital (AT1), which includes instruments issued by the Bank which meet the specified criteria after deduction of remaining 50% investment in the equity of subsidiary companies engaged in banking and financial activities and other specified deductions.

- Tier II capital, which includes general provisions for loan losses (upto a maximum of 1.25% of credit risk weighted assets), reserves on revaluation of fixed assets and available for sale investments after deduction of deficit on available for sale

Banking operations are categorised in either the trading book or the banking book and risk weighted assets are determined according to the specified requirements that seek to reflect the varying levels of risk attached to assets and off balance sheet exposures.

1.5 Capital adequacy ratio

The capital to risk weighted assets ratio, calculated in accordance with the SBP guidelines on capital adequacy, under Basel III and Pre-Basel III treatment using Standardised Approach for Credit and Market Risk and Basic Indicator Approach for Operational Risk is presented below:

	2023	2022
	(Rupees in '000)	
Common Equity Tier 1 capital (CET1): Instruments and reserves		
Fully Paid-up Capital/ Capital deposited with SBP	**11,652,288**	11,652,288
Balance in Share Premium Account	-	-
Reserve for issue of Bonus Shares	-	-
Discount on Issue of shares	-	-
General / Statutory Reserves	**5,219,664**	3,875,828
Gain / (Losses) on derivatives held as Cash Flow Hedge	-	-
Unappropriated profits	**20,607,283**	15,252,756
Minority Interests arising from CET1 capital instruments issued to third party by consolidated bank subsidiaries (amount allowed in CET1 capital of the consolidation group)	-	-
CET 1 before Regulatory Adjustments	**37,479,235**	30,780,872
Total regulatory adjustments applied to CET1 (Note 39.5.1)	**2,396,856**	1,079,985
Common Equity Tier 1 (a)	**35,082,379**	29,700,887
Additional Tier 1 (AT 1) Capital		
Qualifying Additional Tier-1 instruments plus any related share premium	**3,120,000**	3,120,000
of which:		
- *classified as equity*	-	-
- *classified as liabilities*	**3,120,000**	3,120,000
Additional Tier-1 capital instruments issued to third parties by consolidated subsidiaries (amount allowed in group AT 1)	-	-
- *of which: instrument issued by subsidiaries subject to phase out*	-	-
AT1 before regulatory adjustments	**3,120,000**	3,120,000
Total of Regulatory Adjustment applied to AT1 capital (Note 39.5.2)	-	-
Additional Tier 1 capital after regulatory adjustments	**3,120,000**	3,120,000
Additional Tier 1 capital recognised for capital adequacy (b)	**3,120,000**	3,120,000
Tier 1 Capital (CET1 + admissible AT1) (c=a+b)	**38,202,379**	32,820,887
Tier 2 Capital		
Qualifying Tier 2 capital instruments under Basel III plus any related share premium	**4,000,000**	4,000,000
Tier 2 capital instruments subject to phase out arrangement issued under pre-Basel III rules		
Tier 2 capital instruments issued to third parties by consolidated subsidiaries	-	-
(amount allowed in group tier 2)		
- *of which: instruments issued by subsidiaries subject to phase out*	-	-
General Provisions or general reserves for loan losses-up to maximum of 1.25% of Credit Risk Weighted Assets	**2,542,922**	2,746,267
Revaluation Reserves (net of taxes)		
of which:	-	-
- *Revaluation reserves on property*	-	-
- *Unrealized gains/losses on AFS*	-	-
Foreign Exchange Translation Reserves	-	-
Undisclosed / Other Reserves (if any)	-	-
T2 before regulatory adjustments	**6,542,922**	6,746,267
Total regulatory adjustment applied to T2 capital (note 39.5.3)	-	-
Tier 2 capital (T2) after regulatory adjustments	**6,542,922**	6,746,267
Tier 2 capital recognised for capital adequacy	**6,542,922**	6,746,267
Portion of Additional Tier 1 capital recognized in Tier 2 capital	-	-
Total Tier 2 capital admissible for capital adequacy (d)	**6,542,922**	6,746,267
TOTAL CAPITAL (T1 + admissible T2) (e=c+d)	**44,745,301**	39,567,154
Total Risk Weighted Assets (RWA) (i) [Note 39.9]	**248,751,437**	253,664,148

	2023	2022
	----------- (Rupees in '000) -----------	
Capital Ratios and buffers (in percentage of risk weighted assets)		
CET1 to total RWA (a/i)	**14.10%**	11.71%
Tier-1 capital to total RWA (c/i)	**15.36%**	12.94%
Total capital to total RWA (e/i)	**17.99%**	15.60%
Bank specific buffer requirement (minimum CET1 requirement plus capital conservation buffer plus any other buffer requirement) of which:	**7.50%**	7.50%
- *capital conservation buffer requirement*	**1.50%**	1.50%
- *countercyclical buffer requirement*	**0%**	0%
- *D-SIB or G-SIB buffer requirement*	**0%**	0%
CET1 available to meet buffers (as a percentage of risk weighted assets)	**6.60%**	**4.21%**
National minimum capital requirements prescribed by SBP		
CET1 minimum ratio	**6.00%**	6.00%
Tier 1 minimum ratio	**7.50%**	7.50%
Total capital minimum ratio	**11.50%**	11.50%

1.5.2 Additional Tier 1 Capital: regulatory adjustments

Investment in mutual funds exceeding the prescribed limit (SBP specific adjustment)	-	-	-	-
Investment in own AT1 capital instruments	-	-	-	-
Reciprocal cross holdings in Additional Tier 1 capital instruments of banking, financial and insurance entities	-	-	-	-
Investments in the capital instruments of banking, financial and insurance entities that are outside the scope of regulatory consolidation, where the bank does not own more than 10% of the issued share capital (amount above 10% threshold)	-	-	-	-
Significant investments in the capital instruments of banking, financial and insurance entities that are outside the scope of regulatory consolidation	-	-	-	-
Portion of deduction applied 50:50 to Tier-1 and Tier-2 capital based on pre-Basel III treatment which, during transitional period, remain subject to deduction from additional tier-1 capital	-	-	-	-
Adjustments to Additional Tier 1 due to insufficient Tier 2 to cover deductions	-	-	-	-
Total of Regulatory Adjustment applied to AT1 capital	-	-	-	-

1.5.3 Tier 2 Capital: regulatory adjustments

Portion of deduction applied 50:50 to Tier-1 and Tier-2 capital based on pre-Basel III treatment which, during transitional period, remain subject to deduction from tier-2 capital	-	-	-	-
Reciprocal cross holdings in Tier 2 instruments of banking, financial and insurance entities	-	-	-	-
Investment in own Tier 2 capital instrument	-	-	-	-
Investments in the capital instruments of banking, financial and insurance entities that are outside the scope of regulatory consolidation, where the bank does not own more than 10% of the issued share capital (amount above 10% threshold)	-	-	-	-
Significant investments in the capital instruments issued by banking, financial and insurance entities that are outside the scope of regulatory consolidation	-	-	-	-
Total regulatory adjustment applied to T2 capital	-	-	-	-

* This column highlights items that are still subject to Pre Basel III treatment during the transitional period

1.5.4 Risk Weighted Assets subject to pre-Basel III treatment

	2023	2022
	----------- (Rupees in '000)	**-----------**
Risk weighted assets in respect of deduction items (which during the transitional period will be risk weighted subject to Pre-Basel III Treatment) of which:	-	-
- *Deferred tax assets*	-	-
- *Defined-benefit pension fund net assets*	-	-
- Recognized portion of investment in capital of banking, financial and insurance entities where holding is less than 10% of the issued common share capital of the entity	-	-
Recognized portion of investment in capital of banking, financial and insurance entities where holding is more than 10% of the issued common share capital of the entity	-	-
Amounts below the thresholds for deduction (before risk weighting)		
Non-significant investments in the capital of other financial entities	-	-
Significant investments in the common stock of financial entities	-	-
Deferred tax assets arising from temporary differences (net of related tax liability)	-	-
Applicable caps on the inclusion of provisions in Tier 2		
Provisions eligible for inclusion in Tier 2 in respect of exposures subject to standardized approach (prior to application of cap)	**2,542,922**	2,746,267
Cap on inclusion of provisions in Tier 2 under standardized approach	**2,542,922**	2,746,267
Provisions eligible for inclusion in Tier 2 in respect of exposures subject to internal ratings-based approach (prior to application of cap)	-	-
Cap for inclusion of provisions in Tier 2 under internal ratings-based approach	-	-

2 Leverage ratio

According to Basel III instructions issued by State Bank of Pakistan (BPRD circular # 06 dated August 15, 2013), it is mandatory for all the banks to calculate and report the Leverage Ratio on a quarterly basis with the minimum benchmark of 3%.

The leverage ratio of the Bank for the year ended December 31, 2023 stood at 7.49% (2022: 6.22%) above the minimum requirement set by SBP.

		2023	2022
		---------- (Rupees in '000) ----------	
	On balance sheet exposures		
1	On-balance sheet items (excluding derivatives but including collateral)	**418,302,538**	433,636,596
2	Derivatives	**329,109**	452,948
3	**Total On balance sheet exposures**	**418,631,647**	434,089,544
	Off balance sheet exposures		
4	Off-balance sheet items (excluding derivatives)	**91,099,408**	92,879,218
5	Commitment in respect of derivatives (derivatives having negative fair value are also included)	**560,351**	391,075
6	**Total Off balance sheet exposures**	**91,659,759**	93,270,293
	Capital and total exposures		
7	**Tier 1 capital (Note 39.5)**	**38,202,379**	32,820,887
8	**Total exposures (sum of lines 3 and 6)**	**510,291,406**	527,359,837
	Basel III leverage ratio	**7.49%**	6.22%

3 Capital Structure Reconciliation

3.1 Reconciliation of each financial statement line item to item under regulatory scope of reporting - Step 1

	Balance sheet as in published financial statements	**Under regulatory scope of consolidation**
	------------(Rupees in '000)----------	
Assets		
Cash and balances with treasury banks	28,901,856	28,901,856
Balances with other banks	3,985,034	3,985,034
Due from financial institutions	2,900,000	2,900,000
Investments	121,361,640	121,361,640
Islamic financing and related assets	243,067,943	243,067,943
Operating fixed assets	7,091,050	7,091,050

6 Risk Management

The Bank was granted a certificate to commence business in March 2006. The Bank is progressively implementing the guidelines issued by the SBP on risk management while keeping in sight the current and future scale and scope of its activities. Today, for the Bank, Risk Management is a structured approach to manage uncertainty related to an outcome. It is a sequence of activities including: risk assessment, policies, procedures and strategies development which are put in place to identify, measure, monitor and control the risk faced and mitigation of risk using adequate and relevant resources.

In the currently competitive banking market the Bank’s rate of return is greatly influenced by its risk management capabilities as “Banking is about managing risk and return”. Success in the banking business is not to eliminate or avoid risk altogether but to proactively assess and manage risks for the organization’s strategic advantage.

Risk Framework

The Bank's Risk management framework is based on three pillars; (a) Risk Principles and strategies, (b) Organizational Structures and Procedures and (c) Prudent Risk Measurement and Monitoring Processes which are closely aligned with the activities of the Bank so as to give maximum value to the shareholders while ensuring that risks are kept within an acceptable level / risk appetite.

The Board determines the overall risk appetite and philosophy for the Bank. The overall risk is monitored by the Board Risk Monitoring Committee (BRMC). The terms of reference of BRMC have been approved by the Board. Various Management Committees such as Risk Management Committee (RMC), Operational Risk Management Committee (ORMC), Management Credit Committee (MCC) and Asset and Liability Committee (ALCO) support these goals.

The Chief Executive Officer (CEO) and Chief Risk Officer (CRO), in close coordination with all business / support functions, ensure that the Risk Management Framework approved by the Board is implemented in true spirit and risk limits are communicated and adhered for quantifiable risks by those who accept risks on behalf of the organization. Further, they also ensure that the non-quantifiable risks are communicated as guidelines and adhered to in management business decisions.

7.1 Risk Appetite

Risk management across the Bank is based on the risk appetite and philosophy set by the Board and the associated risk committees. The Board establishes the parameters for risk appetite for the Bank through:

- Setting strategic direction;
- Contributing to, and ultimately approving plans for each division; and
- Regularly reviewing and monitoring the Bank's performance in relation to risk through related reports.

It is to be ensured that the risk remains within the acceptable level and sufficient capital is available as a buffer to absorb all the risks. It forms the basis of strategies and policies for managing risks and establishing adequate systems and controls to ensure that overall risk remain within acceptable level.

7.2 Risk Organization

The nature of the Bank's businesses requires it to identify, measure and manage risks effectively. The Bank manages these risks through a framework of risk vision, mission, strategy, policies, principles, organizational structures, infrastructures and risk measurement and monitoring processes that are closely aligned with the activities of the Bank. The Bank Risk Management function is independent of the business areas.

In line with best practices, the Bank exercises adequate oversight through the Risk Monitoring Committee and the Bank's Risk Management Group and has developed an elaborate risk identification measurement and management framework.

Along with the above, business heads are also specifically responsible for the management of risk within their respective businesses. As such, they are responsible for ensuring that they are in compliance with appropriate risk management frameworks in line with the standards set by the Bank.

Business heads are supported by the Risk Management Group and the Finance Department. An important element that underpins the Bank's approach to the management of all risk is independence, where the risk monitoring function is independent of the risk taking function.

The Bank also has credit risk, market risk, liquidity risk, operational risk, and investment policies in place.

7.3 Credit Risk

Credit risk arises from the potential that an obligor is either unwilling to perform on an obligation or its ability to perform such obligation is impaired resulting in economic loss to the Bank. The credit risk arises mainly from both direct financing activities as well as contingent liabilities. The objective of credit risk management framework / policies for the Bank is to achieve sustainable and superior risk versus reward performance whilst maintaining credit risk exposure in line with the approved risk appetite.

The Bank has adopted Standardised Approach for calculation of capital charge against credit risk. Therefore, risk weights for the credit risk related assets (on-balance sheet and off-balance sheet - market and non-market related exposures) are assigned taking into consideration external rating(s) of counterparty(s) for the purpose of calculating Risk Weighted Assets.

The Bank has its own credit rating system (Credit Lens) in place which takes into account both quantitative and qualitative aspects. In addition, pro-active credit risk management is undertaken through risk concentration, counterparty limits, counterparty group limits and industry concentration limits, defining minimum risk acceptance criteria for each industry. Periodic review process and risk asset review coupled with policies on internal watch listing are capable of identifying problem financings at an early stage. In addition a full-fledged Special assets management (SAM) department has also been set up for dealing with problem accounts.

The Bank also uses various Management Information System generated on regular basis to monitor and control past dues, irregularities, shortfalls etc., and also to view the composition of the portfolio and address any concentration issues in terms of segment, risk ratings, tenor, geography etc.

8 Liquidity Risk

Liquidity risk is defined as the potential loss arising from the Bank's inability to meet in an orderly way its contractual obligations when due. Liquidity risk arises in the general funding of the Bank's activities and in the management of its assets. The Bank maintains sufficient liquidity to fund its day-to-day operations, meet customer deposit withdrawals either on demand or at contractual maturity, meet customers' demand for new financings, participate in new investments when opportunities arise, and to meet any other commitments. Hence, liquidity is managed to meet known as well as unanticipated cash funding needs.

Liquidity risk is managed within a framework of liquidity policies, controls and limits. These policies, controls and limits ensure that the Bank maintains well diversified sources of funding, as well as sufficient liquidity to meet all its contractual obligations when due. The management of liquidity is carried out using a prudent strategic approach to manage the Bank's funding requirements.

It is the policy of the Bank to maintain adequate liquidity at all times and for all currencies and hence to be in a position, in the normal course of business, to meet all its obligations, to repay depositors, to fulfill commitments, to finance and to meet any other commitments made.

The management of liquidity risk within the Bank is undertaken within limits and other policy parameters set by ALCO, which meets monthly and reviews compliance with policy parameters. Day to day monitoring is done by the treasury while overall compliance is monitored and coordinated by the ALCO and includes reviewing the actual and planned strategic growth of the business and its impact on the statement of financial position from a statement of financial position integrity and sustainability perspective and monitoring the Bank’s liquidity profile and associated activities.

8.1 Liquidity Coverage Ratio

The Bank calculates the Liquidity Coverage Ratio (LCR) on monthly basis as per Basel III Liquidity Standards issued under BPRD Circular No.08 dated June 23, 2016. The objective of the LCR is to promote the short-term resilience of the liquidity risk profile of the Bank and this standard requires Bank to maintain sufficient High Quality Liquid Assets (HQLA) to meet stressed cash outflows over a prospective 30-calendar days period.

Main drivers of LCR results are High Quality Liquid Assets and Net Cash outlfows. Outflows are mainly deposit outflow net of cash inflows which consist of inflows from financing and money market placements upto 1 month. The inputs for calculation of LCR are as prescribed by the regulator.

High Quality Liquid Assets composed of Level-1 Assets which can be included in the stock of liquid assets at 100% of their market value and Bank has taken Cash & treasury balances and Investments GoP Ijara Sukuk. Furthermore, Level 2A and 2B assets have been taken by the Bank which can meet the SBP criteria.

Liquidity Coverage Ratio

a. Unweighted values must be calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows).

b. Weighted values must be calculated after the application of respective haircuts (for HQLA) or inflow and outflow rates (for inflows and outflows).

8.2 Net Stable Funding Ratio

The objective of Net Stable Funding Ratio (NSFR) is to reduce funding risk over a longer time horizon by requiring banks to fund their activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress.
